CASE STUDY

Bulk Filtration Case No : 5 - 6 - 8

Bulk Diesel Fuel Filter System : Shorco Sykes Hire, Ingleburn, New South Wales

**coates
shorco sykes**

ATT: Ryan Fibbens.

SHORCO SYKES HIRE were looking for a diesel fuel filter system for our contractors pump hire fleet at our major works depot at Ingleburn. We found that Filter Technology had the filter system that suited our needs. We were finding that the fuel in some pumps had contaminants and fuel additives were not solving our problems and we were disposing of the contaminated fuel at a substantial cost.

Filter Technology supplied us with a mobile recycling unit FM504 that suited us very well. The filters used in the unit filter the fuel to a very high standard and as a result we do not now need to dispose of any fuel at all.

The savings that are made on fuel problems in the field and in the workshop has paid for the unit in a relatively short period of time.

Works Manager.

Dane Taylor
