Hydraulics, Hire FM 1640 : Muswellbrook Coal, NSW

Muswellbrook Coal

Muswellbrook Coal hired a FM 1640 to clean their Caterpillar 5230 Excavator Hydraulic system, the unit was run over a weekend shutdown for two days, samples were taken before and after filtering.

The report attached indicates the oil at ISO 20/17 before filtering and after two days connected to the FM1640 had reduced the particulate contamination to ISO 17/15 a 86% reduction.

The patch test also indicates the reduction in contamination achieved using this unit.

ISO 4406 Trend

Comment

Sample cleanliness has improved significantly after filtration @ 17/15. Further filtration may be desirable.
