FM 504 Filtration Buggy Hire Reports

FM 504 Buggy Hire

Many companies choose to hire FTA units to solve individual problems with their plant and equipment.

The two reports attached hired a FM504 on Hydraulic Oil and Fuel

In the report below Brambles were having fuel issues in their underground equipment and by using the FM504 reduced contamination levels in this case by 94% from ISO 20/18 to 16/13 and water levels was also reduced from 762ppm to 43ppm.

The other report is on a Komatsu water cart where the mine has a criteria that all plant entering site must have Hydraulic oil at an ISO below 16/13. Using the FM 504 the oil was reduced from a ISO 20/14 to ISO 15/12 a 90% improvement in cleanliness and well within the mines specification .
