Attention: Don Irvine

Dear Don,

We are very pleased with the performance of the Filter Technology FM04 Oil Filters that we have fitted to our hydraulic test bench. The filters have assisted us to improve the cleanliness standard of the oil we use when testing our client's hydraulic equipment, especially in the 2 and 5 micron particle size.

The filters have been installed in the test bench return to tank line and the latest oil analysis results show a significant improvement in oil cleanliness. The Castrol filtration capability study gives us the assurance that our wear additive package will remain intact.

We have no hesitation in recommending this product to other companies.

Yours sincerely

Daron Crick
