

Cat 3406E Mack Titan Engine Fuel and Oil Filters : Mortensen Transport, Queensland

Mortensen Transport

Mortensen Transport operates a fleet of four B-Doubles from Brisbane, Queensland hauling general freight to and from Cairns.

The Mack Titan pictured below, powered by a 3406E Cat, was fitted from new with two FMO2 filters on oil and one FMF3 filter on fuel. It had travelled 1,000,000km before performing a bearing roll. The owner of the business, Ken Mortensen, was impressed with the overall condition of the crankshaft bearings and the general internal cleanliness of the engine.
